- Trackball: Tri-color notification LED, alerts when new emails, chats, text messages arrive

"The Nexus One represents the unique combination of design and innovation two companies like Google and HTC can have when they collaborate," said Peter Chou, CEO of HTC Corporation. "The Nexus One continues HTC's strategy of offering people a portfolio of phones that meet their diverse needs."

## **Nexus One Software Innovation**

The Nexus One runs on Android 2.1, a version of the platform's Eclair software, which offers advanced applications and features including:

- Google Maps Navigation: offering turn-by-turn driving directions with voice output.
- Email: multiple Gmail accounts; universal inbox and Exchange support.
- Phone book: aggregate contacts from multiple sources, including Facebook@.
- Quick Contacts: easily switch between communication and social applications.
- Android Market: access to more than 18,000 applications.

In addition, the Nexus One introduces new functionality and software enhancements:

- Enter text without typing.
- Use a voice-enabled keyboard for all text fields: speak a text message, instant message, tweet, Facebook update, or complete an email.
- Tell your phone what you want it to do.
- Search Google, call contacts, or get driving directions by just speaking into your phone.
- Take personalization to the next level.
- Dynamic, interactive, live wallpapers react to the touch of a finger.
- More widgets and five home screen panels allow for further device customization.
- Capture camera-quality pictures and video with your device.
- 5 megapixel camera includes LED flash, auto focus, zoom, white balance and color effects.
- View pictures and Picasa Web Albums in the new 3D Gallery.
- Record Hi-Res MPEG4 video, and then upload to YouTube with one click.
- Read your voicemail messages.
- Get transcribed voicemail with Google Voice integration, without changing your number.

## **Pricing, Availability, and Future Plans**

Nexus One is initially available from the Google web store in the US without service for \$529 or starting at \$179 with a two-year contract from T-Mobile USA. In the near future, Verizon Wireless in the US and Vodafone in Europe plan to offer services to customers in their respective geographies. Today, consumers can go to [www.google.com/phone](http://www.google.com/phone) to learn about the Nexus One and place an order. We will initially take orders from consumers in the US and three other markets – the UK, Singapore, and Hong Kong.

In the coming months Google plans on partnering with additional operators, offering consumers access to a broad set of service plans. In the future we expect to launch more phones with Android handset partners and to expand the web store to more countries.

### **About Google Inc.**

Google's innovative search technologies connect millions of people around the world with information every day. Founded in 1998 by Stanford Ph.D. students Larry Page and Sergey Brin, Google today is a top web property in all major global markets. Google's targeted advertising program provides businesses of all sizes with measurable results, while enhancing the overall web experience for users. Google is headquartered in Silicon Valley with offices throughout the Americas, Europe and Asia. For more information, visit [www.google.com](http://www.google.com).
